Let's cut to the chase: In December 2023, Windhoek made history by launching Namibia's first grid-scale energy storage system. This 54MWh project in Erongo Region isn't ...

New modular designs enable capacity expansion through simple container additions at just \$210/kWh for incremental capacity. These innovations have improved ROI significantly, with ...

In response to fast-growing global energy demands, from AI-driven data centres to industrial electrification, TENER Stack is engineered to help utilities, developers, and industrial ...

According to the national utility NamPower, the shipment successfully arrived on Tuesday at the Port of Walvis Bay. The cargo includes eight specialized Power Conversion ...

NamPower, Namibia's state-owned power utility, has signed a contract with a Chinese joint venture to build the first utility-scale battery energy storage system (BESS) in the country and ...

CATL debuts 9MWh TENER Stack, the world's first ultra-large energy storage system with split-design transport compliance, 5-year zero-degradation cells, 20% cost ...

As southern Africa's first mover in grid-scale storage, Namibia's not just solving its own energy puzzle. They're creating a replicable model for the continent's \$12B storage market - and ...

The storage facility will be built at the Omburu substation, an existing grid node in northern Namibia. When the BESS is connected to the grid in early 2026, it will be one of the largest ...

Namibia is not yet self-sufficient, but the combination of grid-scale storage and transmission expansion is laying the foundation for a more resilient and renewable-driven ...

In 2023, Namibia's extreme climate, power reliability challenges, and growing digital infrastructure drove the dominance of HVAC products in the data center market.
