What is the capacity of a new battery system in Delhi?

Situated in South Delhi's Kilokri, the battery system will operate with a capacity of 20 MW/40 MWh. The minister visited the site on Wednesday, and "This is like a huge inverter. It stores electricity and can be used during emergencies or power cuts".

What is India's largest battery-inverter power system?

Minister Sood called the project a "historic milestone" for both Delhi and India's energy sector, setting a new benchmark in regulatory and technological progress. Developed with support from IndiGrid, GEAPP, and TERI, the system is described as South Asia's largest standalone battery-inverter power setup.

How will Delhi's energy storage system help reduce power outages?

The government intends to replicate this model across Delhi to eliminate power outages, particularly during peak demand periods. The advanced energy storage system brings several benefits, including improved grid reliability, better power purchase efficiency, and seamless integration with renewable energy sources.

Why is Delhi launching a battery system?

The minister added that the battery system will help balance the electricity grid, reduce pressure during peak hours, and support the use of renewable energy like solar and wind. This, he said, is part of Delhi's move towards greener energy, the media report added.

New Delhi: Delhi power minister Ashish Sood on Thursday inaugurated a 20-MW battery energy storage system (BESS) at Kilokari, said to be the "largest" in South Asia.

"The 20 MW/40 MWh BESS was delivered on a turnkey basis under a long-term battery energy storage capacity agreement (BESPA) with BRPL. Installed and commissioned ...

Delhi has opened its standalone Battery Energy Storage System (BESS) located in Kilokari, South Delhi, which marks the new milestone in infrastructural development in power ...

The Delhi government is building India's first large-scale battery energy storage system (BESS) at the BSES power grid in Kilokri, South Delhi. This system will store electricity ...
