Through the Clean Energy Program, DCAS works to expand distributed energy resources, including solar PV and energy storage installations across the City's portfolio of properties.

During peak sunlight hours, excess DC energy beyond the load or inverter output capacity can be directly stored in energy storage ...

"Through the Resilient Energy Studio, NYCEDC and Newlab are supporting the next generation of startups as they define the future of urban energy storage," said NYCEDC President and CEO ...

Through the Clean Energy Program, DCAS works to expand distributed energy resources, including solar PV and energy storage installations ...

-PowerBank Corporation, a leader in North American energy infrastructure development and asset ownership, proudly announces that its 3.15 MW DC hybrid solar plus ...

During peak sunlight hours, excess DC energy beyond the load or inverter output capacity can be directly stored in energy storage batteries without undergoing AC conversion, ...

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and storage ...

GE Renewable Energy is currently building the UK's first large-scale DC-coupled battery storage system for a 60MW solar plant for engineering company Wykes. Construction ...

STATEN ISLAND, N.Y. -- Applications for 58 battery energy storage systems were approved by the NYC Department of Buildings in 2025 and another 98 are currently under ...
