What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

Who are Sungrow solar inverters?

A global inverter and storage manufacturer with a complete range of products for solar and storage projects in Australia and New Zealand. Sungrow make a complete range of solar inverters and energy storage products for residential, commercial, industrial and utility grade solar projects.

Who are Fronius inverters?

Fronius Inverters are a world leader in solar technology and one of New Zealand's most sought after and reputable inverters. Founded in Austria in 1945, they have over 65 years' experience producing innovative and intelligent power storage solutions.

What is a string inverter & how does it work?

These include SMA, SolaX, Enphase, Goodwe and Outback. STRING INVERTERS String inverters are the conventional technology whereby all the DC energy produced by the rooftop modules is received by a single inverter located within the home, which then converts the DC current to useable AC current for use within the home.

With a focus on efficiency, reliability, and grid integration, string inverter manufacturers compete to meet evolving industry standards and customer requirements.

At New Zealand Power, we offer the best solar inverter range in New Zealand. All our products are made by leading manufacturers and have features suitable for our climate.

AC Solar Warehouse is an Australian and New Zealand Sungrow distributor/wholesaler with warehouses in Brisbane, Sydney, Melbourne, Adelaide, Perth, Cairns and Auckland.

SolaX offers single-phase and three-phase string inverters, ranging from 600W to 350kW, making them ideal for home solar systems, commercial solar projects, and large-scale solar farms.
