Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

82% of U.S. energy comes from fossil fuels, 8.7% from nuclear, and 9.1% from renewable sources. In 2023, renewables surpassed coal in energy generation. 1 Wind and solar are the ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

Solar power in the United States Solar panels on a rooftop in New York City Community solar farm in the town of Wheatland, Wisconsin [1] Solar power includes solar farms as well as local ...

Solar power installation in North America is extensive, reflecting significant growth and investment in renewable energy. As of 2023, approximately 165 gigawatts (GW) of solar ...

North America ground mounted solar PV market is estimated to grow at over 5.5% CAGR up to 2032, owing to shifting consumer inclination towards cost effective clean electricity generation ...

EIA forecasts that Texas and California will account for almost half of the new utility-scale solar capacity addition in 2025 and that five other states (Indiana, Arizona, ...

By grid type, on-grid installations held 96.3% of the North America solar photovoltaic market share in 2024, while off-grid systems are advancing at a 22.0% CAGR ...

EIA forecasts that Texas and California will account for almost half of the new utility-scale solar capacity addition in 2025 and that five ...

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and ...
