A city where sudden power outages become as rare as unicorn sightings, and solar panels work overtime even after sunset. That's the promise of the Skopje Energy ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

North Macedonia's energy grid as a giant battery-powered picnic basket. You want your energy storage system to keep the "food" (electricity) fresh during cloudy days when solar ...

It adopts high-safety lithium iron phosphate batteries and is equipped with the province's first integrated system of "new energy + energy storage + digital management and control", with a ...

Turkish renewables company Fortis Energy has contracted Pomega Energy Storage Technologies to install a 62-MW/104-MWh battery at the site of a 80-MWp solar park it ...

The US-based Pomega Energy Storage Technologies, specialising in lithium iron phosphate battery production, will install a 62-megawatt (MW)/104-megawatt-hour (MWh) battery energy ...

The battery storage system is expected to enhance the plant's efficiency by storing excess solar energy and improving grid stability. It is scheduled to begin operation in the ...

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for ...

Discover how lithium battery energy storage systems are revolutionizing North Macedonia's renewable energy landscape - and why this matters for global sustainability goals.

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...
