Besides traditional hydroelectric storage, Norway is exploring and investing in other energy storage technologies and facilities to enhance grid stability, integrate more ...

To complete the Strand-Ramstadsletta stretch and to cover the high energy demand required on-site while meeting environmental goals, Skanska relies on a battery ...

The Oslo Grid Energy Storage Project is rewriting the rules of renewable energy management - and doing it with Scandinavian flair. Let's unpack why this initiative matters to ...

If you've ever wondered how Norway keeps its lights on while being Europe's green energy poster child, the recent Oslo pumped storage policy update holds some juicy answers. This overhaul ...

Nordic Batteries designs and manufactures high-power and high-energy battery modules, BMS and BESS products. The company bridges the gap between battery cell ...

Repurposing used EV batteries for stationary storage bolsters the nation's energy resilience. Furthermore, Norway pioneers the exploration of hydrogen as a versatile energy ...

Nordic Batteries designs and manufactures high-power and high-energy battery modules, BMS and BESS products. The company ...

As of March 2025, Norway's government has committed \$2.1 billion to gravity energy storage systems - but what makes this 19th-century physics concept suddenly viable ...

In April 2020, the Norwegian Ministry of Energy granted Norsk Hydro a concession to develop the Illvatn pumped storage power plant. An application for a plan change is being ...

Repurposing used EV batteries for stationary storage bolsters the nation's energy resilience. Furthermore, Norway pioneers the ...
