Will Tata Power install a 100 MW battery energy storage system in Mumbai?

Mumbai, 7th April, 2025 - Tata Power, India's largest integrated power company and a trusted electricity provider to approx. 8 lakh residential and commercial consumers, has received approval from the Maharashtra Electricity Regulatory Commission (MERC) to install a 100 MW Battery Energy Storage System (BESS) in Mumbai over the next two years.

How will energy storage impact India?

The impact is already visible, today nearly half of India's generation capacity is non-fossil. Renewables alone accounted for about 46% of total installed capacity by late 2024. Energy storage will be key to maintaining and growing this share of clean energy as India expands its solar and wind fleets. Current energy storage landscape in India

What are the challenges faced by India's energy storage system?

Grid reliability. Current storage costs pose challenges. Grid infrastructure expansion must align with renewable capacity additions to prevent congestion. The Government of India set up a 'Round-the-Clock' tender to combine renewable energy with storage, yet implementation is pending. Introducing storage systems at various

How big is India's energy storage capacity?

This represents substantial growth from India's current energy storage capacity of approximately 6 GW (mostly pumped hydro), underscoring the need for robust policy and regulatory support to accelerate storage deployment at this scale.

As renewable energy adoption accelerates, BESS plays a pivotal role in enabling a smoother transition. Compared to conventional alternatives, BESS offers a more cost-effective, faster-to ...

Being one of the most urbanised, populated and industrialised states, energy demands are continuously rising, said the report. The ...

Summary: Explore how Mumbai's energy storage projects are transforming grid reliability and renewable adoption. Discover cutting-edge solutions, market trends, and why this technology ...

Tata Power will install a 100 MW battery energy storage system to facilitate peak load management in Mumbai's power network. It will implement the system across ten ...

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ...

The publication includes a wide array of integrated data concerning all energy commodities in India, such as coal, lignite, petroleum, natural gas, and renewable energy.

The system will feature high round-trip efficiency with reduced auxiliary consumption, enhancing operational performance and extending the storage system's lifespan to support Mumbai's ...

India's energy storage sector is still emerging, but growth and planning are rapid. Today, pumped hydro storage provides most bulk storage (existing projects total only a few ...

Being one of the most urbanised, populated and industrialised states, energy demands are continuously rising, said the report. The share of renewable energy in the total ...
