The charging station is a microgrid charging facility that will allow vessels to recharge quickly while reducing peak loads on the community energy grid. It is equipped with ...

Crowley and the Port of San Diego initiate the groundbreaking for an innovative all-electric tugboat charging station.

The charging station is a microgrid charging facility that will enable vessels to recharge quickly while reducing peak loads on the community energy grid. It is equipped with ...

Homes and businesses are the source of electricity demand and locating battery storage systems near them efficiently addresses congestion and grid strain while postponing costly upgrades ...

This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility and is projected to ...

The AES energy storage solution integrates battery modules inside steel containers that are equipped with fire-rated insulation and several redundant layers of hazard ...

Energy storage projects support grid reliability and the integration of more clean energy into the electric grid. Enables the California Independent System Operator (CAISO) to ...

This project demonstrates how mobile charging stations (MCS) can provide a cost-effective, flexible alternative to fixed charging infrastructure, accelerating the electrification of ...

This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility and is projected to be fully operational by June 2025.
