Together with his colleagues at ETH Zurich, Mazzotti has closed this gap: as part of a joint project, the research team has ...

We analyze the effect of such export tariffs on three typical Swiss low-voltage networks (rural, semi-urban, and urban), using power flow analysis to evaluate the power ...

Candi solar is operating as a full-end service provider offering rooftop solar system installation services with zero upfront investment to small scale commercial and industrial clients.

With its new solar contracting, ewz is offering owners with spaces of 500 m² or more an all-inclusive package. You make your roof available to us and benefit from a complete solution ...

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 245 locations across Switzerland. This analysis provides ...

Together with his colleagues at ETH Zurich, Mazzotti has closed this gap: as part of a joint project, the research team has developed a method which allows for it to be determined what ...

Solar farms in elevated Alpine areas will play a particularly key role in the future, as their power output remains high even in winter when power produced by plants on the plains ...

This mini-refinery above the rooftops in Zurich captures carbon and solar power to create clean fuel.

Typically, solar panels in Switzerland are mounted on existing infrastructure like mountain huts, ski lifts, and dams, with larger-scale installations in the Alps remaining rare.

A new thermodynamic formula reveals that bifacial solar cells in double-sided panels generate on average 15 to 20% more sunlight to electricity than the today's one-sided solar panels.. Dual ...
