Standard thicknesses : 6-8-10 mm (other on request) - Dimensions : Jumbos, split sizes Average performance values of DGU (6+12+6 mm) with coating on surface #2, according to the ...

Solar-control hard-coated Glass delivering high levels of light and energy performance and reducing air-conditioning costs due to its low solar factor.

Solarlux® is a solar control and thermal insulation glass, capable of providing high levels of natural light by blocking solar heat radiation. It is made up of a substrate to which several ...

1MM EXT | In Stock | Bin Location: G15-006.

Solaronix is active in the area of renewable energy and has a leading position in the development of new photovoltaic cells imitating natural photosynthesis. In particular, the dye sensitized ...

BRITE SOLAR recently develops ultra thin solar glasses of 1.1 mm total thickness based on Dye sensitized solar cell technology and quasi-solid electrolytes for special applications.

JNS offers ultra thin glass in clear, ultra clear, alumino-silicate, borosilicate, non glare, anti-reflective and other forms. Today Ultra Thin Glass now ...

JNS offers ultra thin glass in clear, ultra clear, alumino-silicate, borosilicate, non glare, anti-reflective and other forms. Today Ultra Thin Glass now comes in many forms and is stronger, ...

High quality sputtered Indium Doped Tin Oxide (ITO) films can be used as electrodes for photovoltaic/solar cells, LCD display, electrochemical deposition, capacitors, Infrared detection ...

Easy to Use: Since it's light and flexible, it's straightforward to work with and can be adapted to different situations. Keeps Getting Better: As technology improves, so does ultra-thin solar ...
