By installing solar control glass in display cases, facades, skylights, walls and entrance doors of shopping malls, you can create a glare-free and UV-protected atmosphere.

Opportunities lie in integrating solar control glass with renewable energy systems and smart building platforms, creating more efficient and occupant-friendly structures.

By installing solar control glass in display cases, facades, skylights, walls and entrance doors of shopping malls, you can create a ...

The fusion of aesthetics and sustainability is now a tangible reality. Mitrex Solar Glass stands at the forefront of this revolution, seamlessly blending cutting-edge photovoltaic ...

California State University's College of Business Administration Building was one of the first buildings in the U.S. to capitalize on the performance and aesthetic benefits of Solarban® 70 ...

Onyx Solar is the global leader in manufacturing photovoltaic glass for buildings. We develop solutions for the integration of photovoltaic solar energy into buildings (BIPV).

Thanks to its transparency and various finishes, photovoltaic glass fits perfectly into contemporary architectural designs without compromising energy performance.

Photovoltaic glass has the ability to convert solar energy into electricity while preserving the transparency of traditional glass. In this way, it adds differences to buildings in ...

Architectural Double Glazed Solar Control Glass consists of two layers of glass separated by a spacer filled with air or inert gas. Special coatings on the glass surfaces control ...

To meet your design and environmental performance objectives, Solarvolt (TM) BIPV glass can be used with spandrel glass, as well as any Vitro low-emissivity (low-e) coating and glass ...
