What is conveyor surface belting?

The belt or conveyor surface belting itself is available in a wide range of materials, such as plastic, leather, rubber, and also coated fabric. Usually the belt is manufactured from several layers of material, the structural or strengthening layer of which is known as a carcass.

What is a plastic belt conveyor system?

Plastic belt conveyor systems are designed to integrate with new and existing production equipment. Machinery that has been laid out to fulfill factory and operator requirements can easily be linked using suitable components and conveyors from our modular range.

Why should you choose a glass conveyor?

Gentle glass transport all along the line! Thanks to its new design, compact construction and transparent covers, the new conveyor technology generation also provides a clear view of key components and fast access for maintenance work.

Our solar energy and panel conveyor systems are designed to integrate with robotics and other automation equipment. A multitude of custom devices ...

Polyurethane bands are located on rollers to provide minimal points of contact on the solar panels and reduce the chance of breakage or scarring.

Our solar energy and panel conveyor systems are designed to integrate with robotics and other automation equipment. A multitude of custom devices and mechanisms are available to gently ...

Improve solar cell tabbing with PTFE conveyor belts designed for high-temperature, anti-adhesive transport. Ideal for stringing machines with seamless or composite belt options.

Montech's belt conveyors SOLTB are designed for the transport of flat, light, and sensitive products. They are therefore ideally suited for fuel cells, ...

Automatic transport of glass sheets and laminates, and framed modules when transport is with the "sunny side down". They are transported by timing belt conveyors.

Gentle glass transport all along the line! Thanks to its new design, compact construction and transparent covers, the new conveyor technology generation also provides a ...

Conveyors to transport glass modules or LCD plates of various dimensions. Belt section of two to five tracks to securely support glass modules over the entire width.

Two and three strand toothed belt conveyors transport the glass and the solar panels smoothly through the plant. Corner conveyors and rotary tables approach the individual manufacturing ...

Montech's belt conveyors SOLTB are designed for the transport of flat, light, and sensitive products. They are therefore ideally suited for fuel cells, battery cells, plastic films, paper, and ...
