Greenhouse gases let the sun's light shine onto Earth's surface, but they trap the heat that reflects back up into the atmosphere. ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for ...

These gases--like carbon dioxide (CO₂)--are referred to as greenhouse gases because, like the glass of a greenhouse, they let visible light from ...

The primary function of greenhouse glass is to trap solar energy, creating a warmer environment inside than exists outside. This is the famous "greenhouse effect," a phenomenon ...

Find solar panels at Lowe's today. Shop solar panels and a variety of electrical products online at Lowes .

Solar panels on a rooftop in New York City Community solar farm in the town of Wheatland, Wisconsin [1]
Solar power includes solar farms as well as local distributed generation, mostly ...

The name "greenhouse effect" was dubbed in the early 1800s when it was thought that greenhouses stayed warmer because the panes of glass ...

The term "greenhouse effect" is a metaphor used to describe the excess warming of the earth due to the addition of "greenhouse gasses". The earth's atmosphere acts like the glass in a ...

Energy from the Sun that makes its way to Earth can have trouble finding its way back out to space. The greenhouse effect causes some of this energy to be waylaid in the atmosphere, ...

Much of this thermal radiation emitted by the land and ocean is absorbed by the atmosphere, including clouds, and reradiated back to Earth. This is called the greenhouse effect. The glass ...
