In this blog, we'll explore the differences between distortion in auto glass and the natural wavy appearance that can be found even in high-quality OEM and OEE glass.

Solar modules are getting bigger, thinner, and more powerful. But from Texas to Thailand, the same problem is appearing: broken glass. Not from hail or mishandling, but from ...

Thin glass is also highly sensitive to thermal variations. During rapid cooling, it may warp (wave effect) or even break inside the furnace due to thermal shocks. Various types of ...

Anisotropy
Roller Wave

Brewster's Fringes
Inspecting Visual Distortions in Glass
Other Visual Distortions in Glass
Distortion in Curved Glasses
Suction Marks on Glass
Anisotropy is a specific visual effect that can be seen in some toughened glass panels under polarised light. It is caused by the different layers of "stress" or tension within the thickness of a toughened glass unit. When polarised light passes through these areas of the glass it can appear as an iridescent or coloured pattern on the surface of th...

Solar Glass - Dr. Schenk
Micro-cracks and chips of the solar glass panels are a major cause of glass breakage and their detection is important for assuring highest quality standards. Apart from the cost for material ...

Solar modules are getting bigger, thinner, and more powerful. But from Texas to Thailand, the same problem is appearing: broken ...

An overview of the most common forms of visual distortions in glass experienced in modern architectural glazing installations.

Wave or Ripple Distortion: Appears as a wavy pattern, usually in the center or across a wider section of the glass. This is more noticeable while panning your eyes across ...

Roller-wave distortion manifests as a fairly consistent series of rippled lines. It's often invisible under normal

circumstances and only becomes apparent when reflections ...

Micro-cracks and chips of the solar glass panels are a major cause of glass breakage and their detection is important for assuring highest quality standards. Apart from the cost for material ...

Wave or Ripple Distortion: Appears as a wavy pattern, usually in the center or across a wider section of the glass. This is more ...
