How has the US solar module manufacturing industry changed in 2024?

The US solar module manufacturing industry experienced record growth in 2024. Domestic module manufacturing capacity grew 190% year-over-year, from 14.5 GW at the end of 2023 to 42.1 GW at the end of 2024. This figure has grown to over 50 GW in early 2025.

What is included in a solar industry update presentation?

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government programs supporting the solar industry. Key updates from the Fall 2024 Quarterly Solar Industry Update presentation, released October 30, 2024:

How many solar modules have been added in 2024?

Since the IRA's passage, more than 95 GW of manufacturing capacity have been added across the solar supply chain (from facilities announced pre- and post-IRA), including nearly 42 GW of new module capacity. U.S. c-Si manufacturers added significant capacity in the first half of 2024.

How many solar modules will the US produce in 2025?

The U.S. is on track to reach 13 GW of cell manufacturing capacity and 65 GW of module assembly in 2025, said a report from Clean Energy Associates. The United States is now the third-largest solar module manufacturer in the world, and more growth is on the way.

Despite the strong first quarter figures, Wood Mackenzie expects the solar industry to contract about 2% annually between 2025-2030, adding an average 43 GW of new solar ...

Solar module manufacturing capacity in the U.S. now exceeds 31 gigawatts (GW), an increase of 25% in Q2 2024 compared to ...

The United States is now the third-largest solar module manufacturer in the world, and more growth is on the way. Clean Energy Associates (CEA) projects that the U.S. will ...

In this article, we will explore the implications of this growth, the investments driving it, and its potential impact on job creation and future developments in solar technology.

The manufacturing surge comes from eight new or expanded factories in Texas, Ohio, and Arizona, according to the U.S. Solar Market ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government ...

The United States is now the third-largest solar module manufacturer in the world, and more growth is on the way. Clean Energy ...

Despite the strong first quarter figures, Wood Mackenzie expects the solar industry to contract about 2% annually between 2025 ...

US solar manufacturing ramped up sharply in the first quarter of 2025, supporting record levels of new capacity as solar and storage made up 82% of additions to the grid.

Under the new law, the solar industry will no longer have access to the Section 48E and 45Y tax credits after 2027 or the Section 25D tax credits (for customer-owned residential ...
