The pilot project entails setting up an electric vehicle with accompanying solar panels and energy storage system.

Guyana has unveiled a new 0.65 MW grid-forming solar project, paired with a 1,500 kWh battery energy storage system (BESS) and a 13.8 kV transmission line.

In a significant step towards advancing solar power in Guyana, an 8-megawatt solar PV farm - the largest of its kind - will be constructed ...

This project is Guyana's largest hybrid solar-plus-storage power facility and is expected to provide greater grid reliability for thousands of residents in the Essequibo region.

Spanning 13 acres, the advanced facility combines solar generation and energy storage to stabilize power supply on the Essequibo Coast. It captures excess solar energy ...

The GUY SOL programme, a collaboration between GPL and SUMEC Group, aims to implement utility-scale photovoltaic projects to enhance Guyana's energy sustainability. ...

The plant is part of Guyana's \$83.8 million Utility-Scale Solar Photovoltaic (Guysol) Program, which targets 33 MWp of solar and 34 MWh of storage across eight sites under the ...

The GUY SOL programme, a collaboration between GPL and SUMEC Group, aims to implement utility-scale photovoltaic projects to ...

Spread across 13 acres, the solar farm combines 5 MW of photovoltaic capacity with battery storage technology capable of retaining surplus energy during daylight hours and ...

The Program is administered by the Inter-American Development Bank (IDB), and aligns with Guyana's Low Carbon Development Strategy. The initiative emphasizes climate-resilient ...
