---

The country now has more than 100,000 rooftop solar projects, adding more than 400MW of clean energy to the national grid, according ...

Of the total solar power generation in 2024, 66.8% (0.73 TWh) came from utility-scale projects, and slightly more than one-third (0.36 TWh) came from rooftop systems.

We explore how rooftop solar systems will help Ireland hit the 80% renewable electricity target by 2030 to secure a greener, more sustainable future for us all.

Despite cloudy skies, Ireland is embracing solar power. Private homes and farms across the country generate clean energy, cut ...

This study quantifies the available residential solar photo-voltaic rooftop capacity and associated annual electricity potential in Ireland for the first time using satellite imag-ery and weather data.

We explore how rooftop solar systems will help Ireland hit the 80% renewable electricity target by 2030 to secure a greener, more ...

Despite cloudy skies, Ireland is embracing solar power. Private homes and farms across the country generate clean energy, cut bills, and help meet climate targets

The country now has more than 100,000 rooftop solar projects, adding more than 400MW of clean energy to the national grid, according to new figures from ESB networks, ...

Ireland surpassed 2.1 GW of installed solar capacity in November 2025, and the country's solar association, Solar Ireland, has revealed that 1 GW of this is from rooftop ...

From RT&#201; News, a new study has found that solar panels could provide 25% of Ireland's electricity needs. The systems produce electricity that can be used to power your ...
