CATL has already made its mark in Brazil, powering the country's first utility-scale storage project, the Registro Energy Storage Project, in 2022. After three years of stable ...

As countries in South America strive to diminish their dependence on fossil fuels and improve the reliability of their electrical grids, energy storage technologies such as lithium ...

As countries in South America strive to diminish their dependence on fossil fuels and improve the reliability of their electrical ...

South American power grid energy storage solutions are gaining momentum as countries like Chile, Brazil, and Argentina race to balance booming renewable energy ...

As South America's renewable energy sector accelerates toward decarbonization, battery energy storage systems (BESS) have emerged as critical enablers for grid reliability and...

As Colbun's first energy storage system, it will allow the power generation company to integrate additional renewable energy capacity and achieve net-zero emissions. It is also Wärtilä's first ...

With a growing emphasis on reducing carbon emissions to combat climate change, nations across the region are allocating resources towards solar parks, wind farms, ...

Atlas Renewable Energy and COPEC inaugurate one of Latin America's largest energy storage systems, strengthening Chile's power grid stability.

A 25MWp PV energy storage project at a South American mining plant is accomplished successfully. It integrated "photovoltaic + energy storage + ecology" with a 25MWp ...

Outside of North America, the South American energy storage market is growing at an impressive rate. More and more companies are looking at South America and harvesting ...
