What is South Sudan's role as a power utility?

Its role as a power utility is expected to intensify as programmes to increase electricity access in South Sudan are implemented. It is proposed under the Electricity Bill 2015 as the regulatory entity for the electricity sector in South Sudan. It would function as the energy regulator whose functions would include the creation of regulations.

How many South Sudanese have access to electricity?

According to the study, only 5.4% of the South Sudanese population have access to electricity, slightly higher than the access rate of 4.2% reported in 2017.

Does South Sudan have a law on electricity?

The most relevant regulation in South Sudan's electricity sector, despite it not being passed into law, is the Electricity Bill of 2015. It is yet to be approved by the council of ministers and acquire the status of a law.

Does South Sudan have a solar PV market?

The solar PV market in South Sudan is growing steadily, but minimal information is available. Additionally, most companies operating in the country within the value chain do not have an online presence. As such, the study mainly relied on primary information collected from the companies with which key informant interviews were conducted.
