What types of ultra thin glass does JNS offer?

JNS offers ultra thin glass in clear, ultra clear, alumino-silicate, borosilicate, non glare, anti-reflective and other forms. Today Ultra Thin Glass now comes in many forms and is stronger, lighter and more versatile than ever. JNS is a global leader in Ultra Thin Glass and carries the following types of Ultra Thin Glass.

What is ultra thin glass?

JNS defines Ultra Thin Glass as any glass thinner than 2mm. It was not that long ago that ultra thin glass did not exist or was very limited. JNS offers ultra thin glass in clear, ultra clear, alumino-silicate, borosilicate, non glare, anti-reflective and other forms.

Does JNS manufacture ultra-thin glass?

Fabrication of Ultra Thin Glass to shape and size: Have a Question? JNS Glass & Coating offers ultra-thin glass in clear, ultra-clear, alumino-silicate, borosilicate, non glare, anti-reflective, and other forms. Call 888-567-4527.

Discover the advancements in ultra-thin solar glass and their benefits for modern photovoltaic systems, including improved efficiency, flexibility, and aesthetic integration, ...

Despite the thinness of the glass, the 1.1mm and 0.8mm ultra-thin glass is strengthened to provide high impact resistance and ...

Ultra-thin solar glass, with its superior light transmittance, flexibility, and reduced weight, is increasingly preferred in both rooftop and building-integrated photovoltaic (BIPV) applications.

We stock and fabricate ultra thin glass in all major material types and sizes -- whether you need 0.2mm flexible glass for electronics or ultra-flat 1.5mm borosilicate for optical applications.

Short Description: KS Glass successfully produced ultra-thin, ultra-light high aluminum chemical strengthened glass coated with AR coating, achieving more than 94% light transmittance. ...

Our 1.1mm Solar Used Ultra Thin Glass Panel is specifically engineered to meet the rigorous demands of solar energy applications. Crafted from high-quality soda-lime glass, this ultra-thin ...
