What are the labeling requirements for external power supplies?

Labeling requirements will be mandated to meet the same International Efficiency Marking Protocol for External Power Supplies Version 3.0 as the previous Level V standard. Globally, it is expected that other nations will soon follow suit with the DoE Level VI standard.

What is the regulatory environment surrounding external power supply efficiency and no-load power draw?

The global regulatory environment surrounding the legislation of external power supply efficiency and no-load power draw has rapidly evolved over the past decade since the California Energy Commission (CEC) implemented the first mandatory standard in 2004.

When will external power supplies become law?

Although there is not an official timeline for these voluntary standards becoming law, Original Equipment Manufacturers (OEMs) who design external power supplies into their products would best be served to future-proof their designs to the latest regulations to ensure that they are in compliance in each region where their product is sold.

Do manufacturers have to comply with energy conservation standards?

Manufacturers have been required to comply with the U.S. Department of Energy (DOE) energy conservation standards for external power supplies since 2007.

Below are the countries or regions mandating that external power supplies (EPS) (with some exemptions) shipped across their borders meet specific efficiency levels:

Meta Description: Discover essential outdoor power supply entry requirements for global markets, including safety certifications, efficiency standards, and actionable compliance strategies.

DOE undertook a rulemaking that concluded with a final rule in February 2014 to established new and amended energy conservation standards for ...

The global regulatory environment surrounding the legislation of external power supply efficiency and no-load power draw has rapidly evolved over the past decade since the California Energy ...

As a family-owned American manufacturer, we maintain complete control over our production process and quality standards. In this article, we'll demystify UL and NEMA ...

The Energy Policy and Conservation Act, as amended ("EPCA"), prescribes energy conservation standards for various consumer products and certain commercial and industrial ...

DOE undertook a rulemaking that concluded with a final rule in February 2014 to established new and amended energy conservation standards for external power supplies.

The central component of OPEI's product standards program is the development, publication, and maintenance of ANSI standards for outdoor power equipment across multiple power sources.

These procedures assure that development of OPEI standards is open to a diverse panel of stakeholders, including manufacturers, end users, retailers, testing and standards ...

A complete guide to mandatory federal efficiency standards (Level VI) for external power supplies. Cover DOE testing, certification, and compliance.
