Does Thailand have a solar market?

Thailand's solar market prospects are further vivified by its broad port and logistical infrastructures. The Bangkok port alone can handle up to 1.5 million exports and imports annually. There is no limit to lucrative opportunities in this blossoming market. What does this mean for you as a solar installer or a professional in the solar industry?

What happens if a solar system does not have an inverter?

Without the inverter, the power generated by the solar system is kind of useless. In simple words, the whole process is when solar panels capture sunlight and convert it into energy, which is sent to the inverter, which turns the DC energy into AC energy. After the energy conversion, solar electricity can power all the appliances and electronics.

We, at SolarFeeds, have brought together nearly all the popular solar inverter wholesalers, who offer a large number of inverters at much cheaper pricing compared to the retail market.
