University of Delaware is credited with creating one of the first solar buildings, "Solar One," in 1973. The construction ran on a combination of solar ...

In the 1950s, the first silicon - based solar cells were developed. However, these early solar cells were fragile and needed protection from the harsh environmental elements. This led to the ...

Discover the fascinating 180-year history of solar panel invention and the broader history of solar energy, from Edmond ...

OverviewCareerEarly lifeShuman Rediscovered: Hemauer and KellerFurther readingIn 1892, Frank Shuman was granted a patent for his invention of wired safety glass. Additional patents were issued relating to the process of making wire glass and machines for making wire glass. In 1914 Shuman invented a process for making laminated safety glass, called safety glass, and manufactured by the Safety Glass Company. In 1916 he patented a "Danger Signal" for railroad crossings, as well as the use of liquid oxygen or liquid air to propel a submarine.

Using selenium, a non-metal element known for its photoconductive properties, Fritts created the world's first solar cell. He ...

On August 20, 1897, Shuman invented a solar engine that worked by reflecting solar energy onto one-foot square boxes filled with ether, which has a lower boiling point than water, and ...

It has entered into an agreement with America's largest fully vertically integrated solar manufacturer, First Solar to manufacture glass for the company's thin film photovoltaic ...

It has entered into an agreement with America's largest fully vertically integrated solar manufacturer, First Solar to manufacture glass ...

Swiss scientist Horace de Saussure was credited with building the world's first solar collector, later used by Sir John Herschel to cook food during his South Africa expedition in the 1830s.
