Have a question? We'd love to hear from you.

We develop and build switch and control cabinets for various machines and equipment - starting from the production of prototypes to serial production. Also special solutions, e.g. a special ...

With the frequency technology become more and more mature, the use of frequency inverter, PLC, digital-analog conversion module, temperature ...

Inverter Electric Control Cabinets are essential components in modern electrical systems. They serve as the nerve centers for controlling ...

The system independently developed by our company can realize vector control and stepless speed regulation of the top drive spindle. The entire system is fully digitally controlled and has ...

As shown in Fig. 2, the 4500 KN top-drive device adopts a structure of dual motors, dual rectifiers, and dual inverters. The driving device includes two sets of rectifier and ...

Our inverters for control cabinet installation have a power range from 0.33 to 215 HP and can be customized with optional plug-in modules. Variable cooling solutions ensure optimum heat ...

With the frequency technology become more and more mature, the use of frequency inverter, PLC, digital-analog conversion module, temperature sensor, temperature module and other ...

Inverter Electric Control Cabinets are essential components in modern electrical systems. They serve as the nerve centers for controlling and protecting inverter operations ...

The system independently developed by our company can realize vector control and stepless speed regulation of the top drive spindle. The entire ...

Top drive electric control system inverter cabinet
