Imagine a giant power bank for an entire region, capable of storing enough juice to light up 50,000 homes during blackouts. That's exactly what Georgia's latest energy innovation brings to the ...

Moscow and separatist Tskhinvali opened a new 110 kV backup power connection to assure uninterrupted electrical delivery to the occupied Tskhinvali Region/South Ossetia.

What is China's first grid-level flywheel energy storage frequency regulation power station? This project represents China's first grid-level flywheel energy storage frequency regulation power ...

Power interruptions can cripple businesses and critical infrastructure. In Tskhinvali, where stable electricity is vital for industries and daily life, uninterruptible power supply (UPS) systems serve ...

The Tskhinvali region only receives electricity from Russia through a single overhead power transmission line. Due to difficult ...

The BESS is designed to optimise existing power plants by reducing part-load operations, enhancing energy efficiency, and providing critical voltage and frequency regulation at the ...

A European automotive plant reduced downtime costs by EUR2.3 million annually after implementing our three-phase UPS systems with automatic voltage regulation. Their production lines now ...

The Tskhinvali Energy Storage Power Station has recently emerged as a critical infrastructure project in the Caucasus region. Designed to address energy intermittency and grid reliability, ...

The Tskhinvali region only receives electricity from Russia through a single overhead power transmission line. Due to difficult geographical and climatic conditions, the ...

Moscow and Tskhinvali have launched a new 110 kV backup power line aimed to ensure uninterrupted electricity supply to occupied Tskhinvali Region/South Ossetia, ...
