How much solar energy did Ukraine invest in 2023?

In 2023, Ukrainian businesses invested around USD 150 mln in solar energy. The plan is to reduce greenhouse gas emissions to 35% of the 1990 level and achieve carbon neutrality by 2060 by replacing coal energy with renewable sources.

Does Ukraine have a solar power plant?

Ukraine's annual solar energy volume is higher than that of Germany, one of the industry leaders. From 2018 to 2020, solar energy capacity increased nearly fivefold. As of 2024, solar power plants account for about 75% of "green" energy production in Ukraine (excluding large hydropower plants).

How much solar insolation is needed in Ukraine?

Solar insolation in Ukraine ranges from 1100 to 1500 kWh/m², making the entire country suitable for solar power plant deployment. The southern regions of the country are optimal for operation. Approximately half of all solar power plants are concentrated in six regions: Ivano-Frankivsk, Dnipropetrovsk, Vinnytsia, Khmelnytskyi, Kyiv, and Mykolaiv.

Is Ukraine's solar market booming amid blackouts?

Ukraine's solar market is booming amid blackouts. See 2025 demand drivers, payback, financing tools and risks - a guide for foreign PV investors

We help you select the best battery technology for Ukrainian solar projects. 15 Years of Engineering Expertise: Our long history in the industry means we understand the complex ...

In 2023, Ukrainian businesses invested around USD 150 mln in solar energy. The plan is to reduce greenhouse gas emissions to 35% of the 1990 level ...

A greenhouse complex in Stanyshivka, Zhytomyr region, Ukraine has achieved significant savings, using solar energy. Over three ...

But the prices for high-quality projects with good geography, reliable and inexpensive grid connection, have not fallen along with demand. Owners ...
