This study investigated the feasibility to design high renewable share wastewater treatment plants through dynamic simulations and optimization, aiming to move towards ...

Cost-efficient wastewater treatment methods using solar power would significantly ensure effective water source utilization, thereby contributing towards sustainable ...

In this study, we present a novel solar-driven thermal-electric cogeneration system (STECS) that, by virtue of solar energy alone, can recover metals from metal-containing wastewater and ...

As the decarbonization of wastewater treatment plants (WWTPs) progresses, leveraging photovoltaic (PV) systems to reduce greenhouse gas (GHG) emissions has ...

Optimizing energy recovery from diverse wastewater streams necessitates sophisticated designs that accommodate varying characteristics of influents. Ensuring ...

This article provides an overview of harnessing solar energy for wastewater treatment plants, highlighting its relevance and importance in the context of renewable energy.

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly ...

Recognizing the substantial energy demands of aeration processes in WWTPs, this study proposes an innovative integration of PV panels with aeration tanks. This approach ...

Photovoltaic (PV) energy systems are considered good renewable energy technologies due to their high production of clean energy. This paper combines a PV system ...

Photovoltaic (PV) energy systems are considered good renewable energy technologies due to their high
