In May 2024, UC Berkeley released its long-awaited Integrated Resource and Activation Plan (IRAP), which outlines the ...

A critical part of our plan to reach net-zero emissions by 2046 is to transition from steam to a new hot-water energy system driven by electric heat pumps, thermal storage and geo-exchange -- ...

The NEEC and associated TES project will construct and expand a regional ground-source heat exchange system, including geothermal wells at Parking Lot 31, underground piping and heat ...

Many universities have implemented, through research projects or own funds, systems with multiple generation sources to cover their own consumption and inject surplus ...

In lieu of installing a new chiller plant to meet a campus need for increased cooling, the University of New Hampshire (UNH) called for the construction of a TES tank to store and deliver a ...

These options include adopting a "Compatible Renewable Energy Ordinance" (CREO), requiring all large BESS projects to obtain state certificates, or adopting incompatible but workable ...

In lieu of installing a new chiller plant to meet a campus need for increased cooling, the University of New Hampshire (UNH) called for the ...

In this guide, we'll dissect what makes these projects tick, using real-world examples that even your neighborhood barista would understand. Who's really reading about ...

The Battery Energy Storage System Guidebook (Guidebook) helps local government officials, and Authorities Having Jurisdiction (AHJs), understand and develop a battery energy storage ...

In May 2024, UC Berkeley released its long-awaited Integrated Resource and Activation Plan (IRAP), which outlines the university's path toward decarbonizing the energy ...
