Where can I get a USB charging port in Japan?

In addition to regular outlets, many modern hotels, airports, and cafés in Japan now offer USB charging ports. USB Type-A: Widely available, especially in hotel rooms and lounges. USB Type-C: Becoming more common in newer hotels and high-end facilities. However, USB ports are not guaranteed everywhere.

Does China have a USB-C charging port?

The country operates on 220V/50Hz power and increasingly features USB-C charging ports that can eliminate adapter needs entirely for compatible devices. Arriving in China with dead devices because you brought the wrong adapter is more common than you'd think.

Do I need a type I plug adapter for China?

You'll need a Type I plug adapter for maximum compatibility, but here's what most travelers don't realize -- China actually uses three different outlet types (A, C, and I) across the country, and what plug adapter you need for China depends heavily on where you're staying and what devices you're bringing.

What is a travel adapter with USB C?

The Travel Adapter with USB C is a great choice. It works in over 150 countries, including the US, EU, UK, and many places in Asia. This means you don't have to worry about plug types when you travel. The adapter has one USB-C port and one USB-A port. You can charge two devices at the same time, like your phone and tablet.

With 1 USB C ports (15W Max) and 2 USB A port (12W Max per port), this Type N Adapter quickly charges your phone, earphones and other devices, reducing your waiting time.
