Through the city's solar power initiative, every suitable building owned by the City of Vienna will "gradually receive a solar power plant - such as the roofs of Vienna's municipal ...

The citizens' power plants project launched by Vienna's municipal energy provider Wien Energie allows everyone to participate in the development of eco-friendly electricity generated by solar ...

Vienna has implemented its photovoltaic initiative in record time: The target of 250 megawatt peak (MWp) solar power capacity was reached ten months earlier than planned.

Our solar power plant in Vienna's Liesing provides the optimum environment in the city for species requiring protection. Our citizen solar power plants allow people to financially participate in PV ...

Get on with the job, don't mess around: the solar systems that have received investment funding must now be built and, above all, connected to the grid.

Meanwhile more than 20 solar power plants have been financed 100% by the people of Vienna (shares start at EUR50 and are limited to EUR10.000 per holder).

It's all courtesy of the sun: The Vienna Solar Power Campaign creates a fundamental framework for the expansion of photovoltaics and has boosted photovoltaic installations and output ...

The solar thermal array was installed 70 metres up on the rooftop of a boiler house at the power station in Vienna's Simmering district. With a surface area of 656 m², the solar thermal facility ...

Through the city's solar power initiative, every suitable building owned by the City of Vienna will "gradually receive a solar power plant - ...

Wien Energie elaborated an innovative model to allow its citizens to take part in the installation of photovoltaics on public buildings' roofs or just beyond the city boundary. The project started in ...
