Our fire suppression technology is specifically designed to be suitable for Li-ion battery fires. Our technology is free from piping or nozzles, making it straightforward to install. With a product life ...

Learn effective strategies to safeguard battery energy storage systems against fire risks, ensuring safety and reliability in energy storage.

ATESS energy storage containers primarily utilize HFC-227ea (heptafluoropropane) for fire suppression, ensuring optimal fire extinguishing performance while maximizing ...

The energy storage fire protection system is mainly composed of a detection part and a fire extinguishing part, which can realize the ...

Strategies must encompass a range of extinguishing agents, ensuring proper responses to an array of fire scenarios, from traditional methods like water and foam to ...

Based on the understanding of fire extinguishing mechanism, new fire extinguishing agents have been developed for battery fires, such as hydrogel fire extinguishing agents and ...

There are three main fire suppression system designs commonly used for energy storage containers: total flooding systems using gas suppression, combined gas and sprinkler ...

Based on the understanding of fire extinguishing mechanism, new fire extinguishing agents have been developed for battery fires, such as hydrogel fire extinguishing agents and liquid nitrogen ...

This webpage includes information from first responder and industry guidance as well as background information on battery energy ...

This fire test demonstrates a Stat-X condensed aerosol fire suppression system on a li-ion battery module in a
