The 8ZR cuts the space required for the DC system in the engine enclosure by 90%, has a 10-year full replacement warranty, and requires no battery maintenance.

Stored Energy Systems (SENS) has introduced its new SuperTorque 8ZR, a fully-integrated and factory-tested DC gen set engine starting system.

gine starting. The new SuperTorque® 8R is a complete system. It radically increases engine starting reliability, frees up significant space in engine enclosures, eliminates battery ...

Unlike conventional starter solutions that combine parts from multiple suppliers, the SENS 8ZR features a compact architecture that saves up to 90% space. This reduction ...

SENS has unveiled the SuperTorque 8ZR, a compact DC genset starting system offering higher reliability, reduced maintenance, and significant cost savings for mission-critical ...

"The 8ZR is the simplest and most reliable engine starting system on the market today." Engineered and manufactured at SENS's ISO 9001:2015-certified facility in Longmont, ...

Stored Energy Systems (SENS) has introduced the SuperTorque 8ZR, a direct-start system designed to guarantee dependable generator starts in mission-critical applications ...

Stored Energy Systems, SENS, the leader in DC power systems, today announced the SuperTorque® 8ZR (8ZR), an innovative DC genset engine starting system engineered to ...

Stored Energy Systems (SENS), a leader in DC power systems, has unveiled the SuperTorque® 8ZR, a groundbreaking DC genset engine starting system designed to ...

Introducing the SuperTorque® 8ZR Engine Starting System Stored Energy Systems, known as SENS, has taken a giant leap in enhancing generator reliability with its ...
