Where does Cuba's energy supply come from?

Cuba's energy supply mainly comes from oil products, accounting for over 80% of power generation.

Does Cuba still have electricity?

Antonio Guterres is now back online, and Cuban energy officials say electricity has been restored in most of the capital city, Havana, and some outlying areas. But they have warned against too much optimism. Cuba's five thermoelectric power plants are obsolete and crumbling.

How is energy used in Cuba?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What are the major energy companies in Cuba?

UNE (Unión Eléctrica) is responsible for the generation, transmission, distribution, and commercialization of electrical energy. CUPET (Unión Cuba-Petróleo) is the state-owned oil firm and Cuba's largest oil company. Other companies operating in Cuba's energy sector include Energas, Inter RAO, Zerus, Havana Energy, and Siemens.
