In 2023, 91% of new power capacity came from renewable sources such as wind and solar. In the first half of 2024, the renewable sector attracted over \$313 billion in ...

The need to harness that energy - primarily wind and solar - has never been greater. Batteries can provide highly sustainable wind and solar energy storage for ...

With the rise of solar and wind capacity in the United States, the demand for battery storage continues to increase. The Inflation Reduction Act (IRA) has also accelerated ...

Exploring cost-effective wind-solar-storage combinations to replace conventional fossil-fuelled power generation without compromising grid reliability becomes increasingly ...

Industrial and commercial sectors are the heavyweights of energy consumption, gobbling up nearly 60% of U.S. electricity (EIA, 2024). Think data centers running AI models, ...

New York's clean energy future requires accelerated growth in offshore and onshore wind and solar, as well as a storage, transmission, and distribution infrastructure to move renewable ...

Industrial and commercial sectors are the heavyweights of energy consumption, gobbling up nearly 60% of U.S. electricity (EIA, ...

"Solar panels, wind turbines, electric vehicles and battery storage are benefiting people in all 50 states, providing the building blocks of a clean energy system free from dirty ...

Explore what 2025 holds for clean energy--from solar and wind growth to storage innovations and grid modernization. Key insights from FFI Solutions.

In 2024, 91% of new renewable projects offered cheaper electricity than the lowest-cost, new-build fossil fuel alternative. The cost of battery energy storage systems for grid ...
